To: The Camerounian People

All Cameroun News outlets & International Media

Our Fellow Countrymen and women'

It is said that "You may chain a man, but you will not chain his mind; you may enslave him, but you will not conquer his spirit; you may maintain the people in bondage by force, but sooner or later, their anger and frustration becomes so great that force cannot contain it. Then the edifice cracks, the mortar crumble."

Our beloved country will never be the same again from now henceforth because "Only those who can see the invisible can accomplish the impossible" - This is the mission of the brave men and women behind the mask of The Commando Alliance Brotherhood of Cameroun. You're either with us or against us.

The elections had come and gone and Biya has been declared winner as every one of us expected especially with the rigging instruments put in place by Elecama. If some of you were still dreaming that Biya and his cohorts were just going to pack their bags and baggage's including the millions of FCFA they have embezzled from our taxes and resources and just leave their positions and offices, then you were all mistaken!

We know, you know that, we know that, sycophants like Biya and his gang who don't want to quit at right time in peace will surely end-up at a wrong time in pieces. Therefore, this team of concerned Cameroonians have come to agree that 'We should not fear to enter a forest because there are wildcats around in the trees. We should not yield our right to well-controlled speculation. It is certain questions entailed in such speculation which the administrators of established knowledge fear... But in entering the cosmic age we should certainly insist on the right to ask new, even silly questions without being molested'

Though Samuel Fonkam AZU'U is the boss of Elecam, the rigging mercenary and activities of this fraudulent organ is solely directed by the Chief Electoral Officer Sani Tanimou. The Commando Brotherhood Alliance calls on all Camerounians to join hands and heads together and throw the dictator out via the window. Biya will be soon be learning that his agenda has been unfolding over for too long because Cameroonians had given away their mind and their responsibility. The time has come when Cameroonians would rather do what they think is right for Biya to consider the wider consequences because the Cameroonian he knew to be docile is long gone.

Ignorance is bliss, we say, and that's true - but only for a while. It may be bliss for this regime not to know that a tornado is coming because they have no need to worry or take action with the military on their side. But this time around, the heads of all concerned Cameroonians especially the Youths is in the sand their bum is in the air, the tornado is still coming and very strong indeed.

If Biya and his cohorts looked up and call for a smooth transition before the end of November 2011, disaster could be avoided, but ignorance and denial will ensure that the regime will get the full force and the most extreme consequences, because our commandos will strikes the regime when least expected and are least prepared. Camerounians are hereby informed that Sergeant Chef Sylvain Lele Bedjim is safe and sound.

Like we said earlier, ignorance is bliss - but only for so long. The Brotherhood creates our own reality by our thoughts and actions. For every action or non-action there is a consequence. When we give our minds and our responsibility away, we give our lives away. If enough of us do it, we give Cameroun away and that is precisely what we have been doing throughout since the 1992 presidential elections. This is why Biya and his selected few have always controlled the Cameroonians. The only difference today is that the commando Brotherhood Alliance will never again let it happen.

The regime can no longer instil fear into us or use its divide, rule and conquer strategy. Camerounians now know that they have all the powers to decide their destiny. Judge Alexis Dipanda Mouellel announcement that Biya won with 77.98 percent of the vote has just giving us that ticket and this is considered as a declaration of WAR.

Soon, all of them will be called to give an account of their stewardship to the Camerounian people. MTN and Orange telephone companies in Cameroun are also warned to stop providing clients detail to security agents or they will face their bosses and every one involve in this nasty act will face the brute force of the barrel.

The Commando Brotherhood Alliance calls on the Gendarmes, Police, the Military and especially BIR, to join us finish the job sooner than later. To all the politicians, instruct your militants and sympathisers to be ready to lend the support. That's all we are asking because Life is forever and everything is just an experience on the road to enlightenment. Viewed from the highest level of perception, there is no good and evil, only consciousness making choices to experience all there is to experience.

To the international community especially France is warned. Your constant support even in the face of deteriorating situation in Cameroon will not go unpunished. You are advised to call back Daniel Leandri or you will face our rudeness with impunity soon. To the international election observers and their respective organisation, we say thank you for your double standards.

Muammar Gaddafi's death should serve as a serious warning to Biya because The Commando Alliance Brotherhood of Cameroun will use its brute force to fish him out even if he will want to hide in a swallow's nest since others have been hiding in holes and drainage pipes like moles and rats.

Camerounians will hear from us soon. Until then, we will meet in the battle fields of North, East, West and South.
